EXPERIENCE

QA Manager Technical

2017 - Now

ZNet Technologies Private Limited, India, Jaipur

- Led a dynamic 15 members QA team in planning, executing, and managing comprehensive test strategies for multiple projects.
- Implemented and maintained a robust test automation framework using Selenium, resulting in a 30% reduction in testing cycle time.
- Spearheaded performance testing initiatives with JMeter, identifying and resolving scalability issues to enhance system performance.
- Developed and executed API testing strategies, ensuring seamless integration and functionality of APIs in various software ecosystems.
- Championed Agile methodologies, actively participating in Scrum ceremonies, sprint planning, and backlog grooming to enhance collaboration and efficiency.
- Conducted security testing to identify vulnerabilities and implemented measures to fortify application security.
- Demonstrated expertise in leveraging Orthogonal Array Testing Strategy (OATS) to design efficient and comprehensive test suites.
- Work closely with developers, product managers, UX/UI designers, Sales, Marketing and other stakeholders to understand requirements and provide valuable input throughout the development life cycle

Sr. Software Quality Analyst

2015 - 2017

Askillt Solutions India Pvt. Ltd, India, Jaipur

- Actively participated in all phases of the Software Defect Life Cycle, including Assembly,
- Product, and Regression Test Phases, following the Agile Model.
- Orchestrated the test preparation and execution phases, ensuring the comprehensive testing of software modules.

Sr. Software Test engineer

2008 - 2015

Commelius Solutions (U.K based company), India, Jaipur

- Develop and implement comprehensive test plans and strategies for e-learning platforms and mobile applications, considering the unique requirements of both domains.
- Execute test cases across different devices, browsers, and platforms to ensure compatibility and optimal performance.

Oversee the regression testing process to validate that new features or updates do not negatively impact existing functionalities in both e-learning and mobile applications.

- Manage the end-to-end defect life cycle, including identification, documentation, prioritization, and verification.

Software Test Engineer

2007 - 2008

DotSquares Pvt Ltd Jaipur, India, Jaipur

- Assist in creating and updating test plans based on project requirements for e-commerce applications in the travel, hotel, and jewelry sectors.
- Collaborate with senior testers and stakeholders to design detailed and comprehensive test cases that cover various aspects of functionality, usability.
- Execute test cases manually to identify defects and ensure the quality of e-commerce applications in the travel, hotel, and jewelry domains.
